Know where you are and where you are going

Estimated time of arrival and total distance

Memory card slot

Navigation systems

Nowadays, people are constantly on the move. In an increasingly mobile world, people rely more and more on personal navigation products as a vital tool to facilitate mobility. With illuminated maps and voice-guidance systems, personal navigation products are a natural transition to paperless navigation. Getting directions has never been so stress-free. GPS (Global Positioning Systems) navigation systems give you spot-on navigation, wherever you are and are as easy to use as a mobile phone. And if you need to re route your journey – to avoid congestion, road work or traffic accidents – GPS navigation systems can do this for you automatically.

The unique advantages of TomTom GO

- **Complete car navigation solution in one box including car mount**
- **Smart and easy, door-to-door navigation:**
 - Switch on. Upload your maps. And Go
 - Clear, high quality voice guided route instructions
 - Crystal clear 3-D view – even in direct sun
 - Long-life rechargeable battery and cigarette lighter operation
 - Latest maps and millions points of interest
 - Highly sensitive, integrated satellite receiver
 - Simple touch-screen operation
- **Unique Assisted Satellite Navigation system:**
 - Uninterrupted navigation – even in tunnels
- **Modern and sleek design to fit your style**
- **Highly portable – easy to fit and remove in seconds**

Easy mount on dashboard or window
