GPS receiver

TomTom gets you there

Product Information

System requirements to install

Installation of the software requires a PC with Windows 98 SE/NT/ME/2000/XP, a CDROM drive and internet access. The PC must be connected to a Pocket PC device using ActiveSync®. ActiveSync® is supplied with your Pocket PC.

Memory requirements

There should be sufficient memory available on your Pocket PC for the application and the maps.

• Application

7 MB of free memory to install and 5 MB extra to run the application.

• Maps

The maps are available in four sizes (depending on the region/country):

- Section maps of 16 MB
- Section maps of 32 MB
- Section maps of 64 MB

- The complete map of a region/country

Please check www.tomtom.com for availability of all regions/countries.

You can increase your Pocket PC's memory at any time by purchasing an extra memory card. Please consult your Pocket PC supplier for further information.

Languages

The application runs in English, German, French, Dutch, Italian and Spanish, Danish and Swedish. Additional languages to use for verbal instructions are: Belgian Dutch and Norwegian.

Suitable for the following types of Pocket PCs:

iPAQ: 3870, 3970, 54xx, 55xx, 1940, 1945, 2210, 2215 and 4150, **Jornada:** 5xx, **Toshiba:** e330, e35x, e740 BT and 740 WiFi, e750 BT, e750 WiFi, E400 and E800 BT/WiFi, **Casio:** E115, E125, E200 and EM500, **Mitac:** Mio 338, 338 Plus, 339, 528 and 558, **Packard Bell:** Pocket Gear 2030, 2060, 3025, **Fujitsu Siemens:** LOOX 600 and 610, **O2 / Telfort:** XDAll and Qtek 2020, **T-Mobile:** MDAll

Please check www.tomtom.com for up-to-date list.

For a compact and flexible mounting solution in your car we recommend that you use the TomTom Car Kit or TomTom Holder. These are sold separately. Please ask your supplier for the compatible Car Kit or Holder for your Pocket PC.
