TomTom BRIDGE: Empowering fleet drivers and dispatchers with Astrata DriverLinc

With more than 25 years of experience, Astrata is a trusted leader in location based IT services and solutions. Its products help customers to monitor, track or control the movement and status of machinery, vehicles, personnel and other assets.

Astrata's advanced location-based IT services and solutions (GEO-IT) combine GPS, wireless communications and geographical information technologies.

With DriverLinc, Astrata introduces a fundamental redesign of driver-side operations, opening up a new generation of on-board computing and fleet management. Easy and intuitive to use while driving, DriverLinc combines the expertise of market-leading fleet management solutions with the power and mobile operation of TomTom BRIDGE.

The solution

- Dynamic widgets show unread messages or assignments.
- Driving time, shift duration, extended driving and daily rest are indicated.
- Fully integrated with the Tachograph, showing speed data.
- Image capturing can be used for document scanning, onscreen signature capturing or vehicle picture sharing.
- Connection to Omni view cameras for greater safety.

The results

- Time critical deliveries can be delivered safely.
- Save up to 8% on fuel (and related CO2 emissions) with Driver Coach.
- Reduce dispatcher workloads by up to 50%.
- Cut operating costs by 2% thanks to remote tachograph downloads.
- Win new customers due to the improved capabilities of TomTom BRIDGE.

"What a great tool! The DriverLinc makes my day a lot easier, especially the new Assignment feature which helps me pace my tasks."

~ Steven Kurs, Hildelang Logistics Driver
