

# Secure Mounting Solutions for TomTom BRIDGE

## TomTom BRIDGE: Kept safely secured by Brodit for ease of use in any fleet

It's vital for your business to recognise the importance of well-functioning products as a complement to your communication devices and fleet management systems. Brodit offers a two-part solution for installing TomTom BRIDGE and its docking station in any vehicle.

The Brodit solution consists of a custom-fit holder for the TomTom BRIDGE which is then attached to a mounting base for the vehicle. Users have easy access to the device and all its functions. A charging cable can also be attached to the TomTom BRIDGE while in the holder. The device is locked into place and can only be removed with a key, so it's safe to be left in the vehicle while making a stop. It's simple to adjust the angle of the device to suit the driver, ensuring it's comfortable to operate. The Brodit mounting solution for TomTom BRIDGE is sturdy and places the device within easy sight and reach, making everyday operation easy.

Brodit develops and manufactures products for installing communication devices in vehicles. Brodit was founded in 1983 and is located in Karlsborg, Sweden. The company has 100 employees, is a market leader in Scandinavia, and exports to 30 countries. More than three decades of expertise in customer-oriented problem-solving has made Brodit a specialist in mounting solutions.

### The solution

- A rugged holder made of black Acetal and ABS plastic.
- A built-in lock so the device is safely secured and easily accessible, but difficult to steal.
- A tilt swivel so drivers can adjust the angle of their device to make operation more comfortable.
- The holder can be installed onto a high strength mounting platform, a custom-fit plastic bracket for vehicles, or a super-strong Pedestal Mount – an aluminum module mounting system for flat surfaces.

### The results

- A strong and durable mounting solution for use with TomTom BRIDGE in any vehicle.
- The Brodit two-part solution offers flexibility and versatility – you can combine products to suit your fleet's specific needs.
- Choose from a wide range of high-quality products made in Sweden.
- For large quantity orders or special projects please contact Brodit for a quote.

“Our secure mount for TomTom BRIDGE helps reduce sat nav theft and saves drivers time, as there's no need to remove it when making a stop.” - Peter Hermansson
