

Your Entire Fleet at a Glance

TomTom BRIDGE: Providing customers with valuable fleet knowledge in real time with frameLOGIC

FrameLOGIC creates outstanding technology solutions for fleet and mobile workforce management, supporting businesses in a wide range of industries for over 10 years. The solutions offers tangible benefits, including efficiency increase, cost minimisation, and the creation of optimal conditions for further growth. Working on continuous innovation, FrameLogic is partnering with TomTom BRIDGE to offer customers an even better ROI.

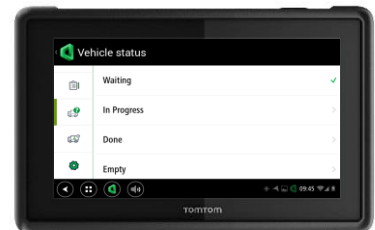

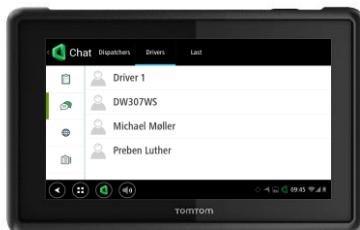

The solution

- Combining TomTom BRIDGE - an ideal device tailored for transportation companies' needs - with open API for its Android™-based OS allowed frameLOGIC to focus solely on integration.
- Within just a few weeks, frameLOGIC could develop and implement its fleet management features such as positioning via BRIDGE, sending routes to a driver, messenger for drivers and dispatchers, work progress and activity reporting tool, docs scanning and transferring, and real time information on drivers' working time.

The results

- Product was launched in just few months, raising high interest amongst frameLOGIC's customers in Poland, Denmark, and Germany.
- Helped to achieve remarkable savings and efficiencies in idling reduction.
- Which can result into a better ROI.

"TomTom BRIDGE, enhanced by frameLOGIC solutions, is a game-changer for the transportation market." - Grzegorz Janaś, Marketing Manager, frameLOGIC
