

TomTom BRIDGE: Giving professional drivers easy vehicle management with IVECO

TomTom BRIDGE for IVECO Daily Electric is the result of TomTom and IVECO teaming up to give professional drivers a tailor-made solution that fits their unique needs. Its semi-integrated dashboard dock delivers the comfort of a built-in system with the flexibility of a detachable device.

The customised user interface makes operating the device on the road a breeze, while the dedicated vehicle management app gives drivers all the information they need about their vehicle power usage and drivetrain. The on-board TomTom navigation app with world-class Traffic information ensures drivers can reach their destination faster. Upon arrival, the device is easily undocked and drivers can enjoy its rugged design outside their vehicle.

Delivery management apps allow drivers to perform a wide range of out-of-vehicle operations, like barcode scanning and digital signatures. The device can be customised further with any of the additional apps available for download in the App Store. Users can even develop their own apps via the Bridge Application Programming Interface (API).

The solution

- Access vehicle data (shift position, batteries, e-motor).
- Assess and adjust driving style via an easy 'green zone' indicator.
- Monitor the vehicle's power consumption and regeneration.
- View the power boost when available.
- See the breaking mode for power regeneration (normal, extra).

The results

- Custom interface and vehicle management app:
 - Unique user interface,
 - Bluetooth connection to vehicle telematics gateway,
 - Dedicated vehicle management app.
- Essential apps to drive your business:
 - Best-in-class navigation technology from TomTom,
 - Demo App Store by AppCarousel with even more apps,
 - Relevant delivery apps for professional workers.

"TomTom BRIDGE for IVECO Daily Electric offers professional drivers real-time vehicle monitoring, coupled with operational apps that can be tailored to their unique business needs." ~ IVECO
