

Professional Navigation Solutions for Trucks and Fleets

TomTom BRIDGE: Offering truck and fleet-specific navigation with PTV Navigator

Narrow roads, low bridges, no opportunities to turn around – a lot of roads are not made for freight traffic. But does your navigation device know that?

PTV Navigator will only guide your drivers on routes that are suited and permissible for their vehicle type. This helps businesses be more cost efficient, enables safe planning and can lead to less stress. You can rely on software specially designed for professional fleet management, that is both scalable and configurable – now available on the fit-for-purpose TomTom BRIDGE device.

The solution

- **TRUCK RESTRICTIONS:** Automatically have all restrictions and limitations for your vehicle type included (dimensions, axle load, road restrictions, etc.).
- **LATEST TRAFFIC INFORMATION:** Consider the latest traffic information for your route planning and navigation with TomTom Traffic. Always have an eye on your ETA (Estimated Time of Arrival) and just re-route if you want to avoid traffic jams.
- **TRUCK PARKING FINDER:** Easily find free parking lots along your route. Profit from the huge community based data set of Truck Parking Europe with more than 22.000 truck parkings and 27.000 industrial areas throughout Europe.
- **EASY NAVIGATION:** Realistic signposts and junction views. Reads out turning instructions, road names, signs and traffic reports.
- **API:** Includes extensive programming interface for process integration.

The results

- Enables safer planning
- Avoid routing error and help save time
- More comfort for the driver
- Cost efficiency

“Thanks to Truck Parking Europe, I can always find the best available parking to rest and enjoy the life of a trucker.” ~ Hans Radefeld, Trucker, The Netherlands
