

Accurate Real-Time Data Gives Greater Control of Processes

TomTom BRIDGE: Gaining total control of your processes with Prometheus Informatics

The waste industry is a highly demanding and competitive one. One of the leading software and service manufacturer of telematics and fleet management systems, Prometheus Informatics, delivers their solutions to the largest and most successful players in the field.

As the waste industry is always looking to create more efficient processes, reliable information from the field is essential. Order-related information like weighing-scale data or driving and working hours is essential for taking control and enabling fast invoicing. In this industry, real-time information exchange and dynamic planning is crucial for survival.

The European waste industry is facing increasing legislation of operations. Full control of logistic processes is vital for the future.

The solution

- TomTom BRIDGE is customised to meet customer needs in process support, control and data collection.
- By connecting all available data sources on the truck, such as weighing scales, vehicle information (FMS) and ID equipment, combined and relevant high-quality data from delivered services is guaranteed.
- TomTom BRIDGE's 3G connectivity offers real-time connection with the planning department, enabling paperless processes and control for both drivers and planning personnel.
- Full process control and support is achieved via the dynamic dialog on TomTom Bridge. Easy adjustment and changes in the dialog are ensured by E-MDS software.
- Integration with vehicle equipment like weighing scales, lifting equipment or ID registration is fully supported within the E-Mobile platform.

The results

- Integration with multiple ERP, TMS and APS back-office systems is easily facilitated.
- The biggest companies in the waste industry in the Benelux are already using these systems and services.
- Communication between planner and driver is significantly improved.

"TomTom BRIDGE delivers an innovative, reliable and robust solution to support paperless working." ~ Leon van Kempen, Prometheus Informatics
