

Monitoring Your Fleet On the Road

TomTom BRIDGE: Offering easy access to FMS content from the device with The Vehicle Group

Combining specialist technologies of fleet management, automotive security, driver safety and power management, The Vehicle Group (TVG) is a trusted partner to fleet managers throughout the UK.

Using their extensive industry expertise, TVG provides complete solutions for a variety of challenges facing commercial vehicle operations. Systems are developed for the daily user and this intelligence-led design makes TVG the supplier of choice for some of the UK's largest fleets, including Royal Mail, The AA, The RAC, DPD, British Gas and many more.

The solution

- TVG has developed a special interface cable between the FMS plug and the TomTom BRIDGE cradle.
- As well as the hardware, TVG has developed an application that monitors all the information coming from the vehicle via FMS following the SAE J1939 standard.

The results

- Provides an out-of-the-box solution including:
- Live Monitoring of Driving Style,
- Vehicle Speed from wheels to tachograph,
- PTO Integration,
- Real-time fuel usage and current fuel level,
- Updates each input within 0.5 seconds,
- Color-coded indicators.

“The FMS integration made available on the fit-for-purpose TomTom BRIDGE is one of the many solutions created by TVG to give truck drivers an easy and real-time overview of their driving style and fuel usage.”

~ Graeme Frankland, Managing Director, TVG
