

The #1 Remote Support Software Now Available for Your Fleet and Workforce

TomTom BRIDGE: Offering remote support, remote access, and online meeting software with TeamViewer

Launched in 2005, TeamViewer focuses on cloud-based technologies to enable online support and collaboration in real time across the globe. Remote support, remote access, and online collaboration aren't just buzzwords. They represent helping people, better integrating technology into our daily lives, and creating new ideas.

TeamViewer believes that wonderful things happen when people get together, and technology should enable them to do so from anywhere in the world. It should act as a catalyst to promote and amplify people's ideas and improve their ability to solve issues and overcome challenges.

The solution

- Start and use TeamViewer on TomTom BRIDGE instantly*. TeamViewer even works behind firewalls and automatically detects any proxy configuration.
- Enjoy a state-of-the-art user interface that is clearly arranged, simple, touch-friendly, and quick to operate.
- Built-in reporting features log connections that note who did what, when, and for how long. This can serve as the basis for precise billing. You can also take advantage of session commenting capabilities and customer feedback forms.
- Available in more than 30 languages.

The results

- Solve issues remotely or bring customers and colleagues together without complex steps or lengthy preparation time.
- Support, assist, interact, and collaborate with people, exchanging documents and information. One tool makes it possible to work as if you were all in the same room, saving on travel time and expenses.
- More people rely on TeamViewer for clientless remote support than any other software solution. Over 1.2 billion TeamViewer IDs have been created on devices around the world so far.

“TomTom BRIDGE integration offers a remote solution for connecting people worldwide, saving on travel time and expenses.” ~ Constatin Falcoianu, Business Development Manager, TeamViewer

* Supporting mobile devices like the TomTom BRIDGE requires a TeamViewer Premium or Corporate license. For licensing options and pricing visit www.teamviewer.com or call the TeamViewer sales department.
